SUMMARY

Senior Full Stack Engineer with 7+ years of experience building web and mobile applications, APIs, and microservices with TypeScript, Node.js, React, Next.js, React Native, and .NET on Azure and AWS. Specialized in process automation and system integrations (ERP, EDI), including a self-service and automation platform that saved ~31,000 hours and ~R\$5.9M in operational costs per year. Experienced in CI/CD, automated testing, code reviews, and mentoring developers, turning business needs into scalable technical solutions. Postgraduate degree in Software Architecture and Solutions.

EXPERIENCE

Senior Software Engineer - Cast4IT

Nov 2022 - Present

- Built a self-service platform and automation workflows with React, Next.js, and Node.js that let users resolve password lockouts and access requests on their own, **saving ~31,000 hours and ~R\$5.9M in operational costs per year, with a 71% resolution rate** without analyst intervention
- Automated operational workflows that previously required analysts, including ticket management, proactive password expiration notifications, error detection, and automatic follow-up on pending customer information.
- Built a centralized platform for analysts that consolidates data from multiple systems through microservices and external integrations, eliminating manual data gathering and enabling faster, more consistent customer analysis.
- Implemented accessibility (**WCAG**) and internationalization (**i18n**) standards across internal applications.
- Built **CI/CD** pipelines with **Github actions** and wrote unit tests with **Jest, Vitest and React Testing Library**, reducing production issues.
- Conducted code reviews and provided developer training and technical mentoring.

Mid Software Engineer - Pague Menos Drug Store

Aug 2021 - Nov 2022

- Built a **purchase order automation system** for ordering directly from manufacturers using **C#/.NET, React, and React Native** on **Azure**, reducing manual work for employees and helping prevent product shortages.
- Integrated with manufacturers via **EDI**, using background workers to automate order and invoice exchange.
- Developed **SQL Server** stored procedures and triggers for order processing and inventory data.
- Used **Azure CI/CD pipelines** with **Azure DevOps** and conducted code reviews to maintain code quality.

Full Stack Developer - Tijuca Alimentos

Sep 2019 - Aug 2021

- Designed and delivered a Warehouse Management System (WMS) using JavaScript and PHP for inventory management, product location tracking, and **FEFO** (First Expired, First Out) picking optimization, **reducing the time operators spent locating products and sorting them by expiration date.**
- Built an **offline-first React Native** sales app for field sales representatives, using **SQLite** for local storage and data sync, enabling orders without internet connection and **speeding up order processing**, with geolocation for customer visits.
- Integrated the platform with the **in-house ERP** through Node.js/PHP backend services, and developed a React admin dashboard for sales management.
- Implemented system integrations using Pentaho ETL and background workers, and developed SQL Server stored procedures and triggers.
- Set up and managed CI/CD pipelines with GitLab CI and containerized applications with Docker and Docker Compose.
- Created business intelligence reports with Power BI to support business decisions.

IT Technician - Tijuca Alimentos

Jun 2017 - Sep 2019

- Maintained and installed CCTV and network infrastructure, assembled and maintained computers, installed and configured software, and provided training and support for system implementation.

SKILLS

Languages	TypeScript, JavaScript, C#, PHP
Backend	Node.js, Nest.js, Express, C#, .NET, PHP, REST APIs
Frontend / Mobile	React, Next.js, React Native, Angular.js, Redux, jQuery, Storybook, HTML, CSS
Databases / Data	PostgreSQL, SQL Server, MySQL, MongoDB, ETL, Pentaho
Cloud / DevOps	Azure, AWS, Docker, Kubernetes, Jenkins, CI/CD, Git
Architecture	Microservices Architecture, Event-Driven Architecture, Scalability, High Availability
Quality / Leadership	Jest, Vitest, React Testing Library, Unit Testing, Code Review, Stakeholder Communication, Mentoring

KEY ACHIEVEMENTS

- Increased test coverage by 60% through comprehensive unit tests using Jest, Vitest and React Testing Library.
- Delivered critical projects 20% ahead of schedule through efficient agile practices.
- Reduced application load time by 40% using Next.js optimizations.

EDUCATION

Postgraduate Degree in Software Architecture and Solutions - XP Education	Mar 2024 - Jan 2025
Analysis and Systems Development - Uninter	Feb 2017 - Jul 2019

LANGUAGES

English: B2 | Portuguese: Native
