SUMMARY

I am a Senior Software Engineer with over 7 years of experience in software development. My expertise lies in TypeScript, Node.js, React, Next.js, and .NET. I have a solid track record of building and maintaining web applications, APIs, and scalable solutions. I am well-versed in microservices architecture, cloud environments, CI/CD practices, and automated testing.

I hold a postgraduate degree in Software Architecture and Solutions and have experience in code reviews, mentoring developers, and translating business needs into effective technical solutions.

EXPERIENCE

Senior Software Engineer - Cast4IT

Nov 2022 - Present

- Created a self-service platform that empowers users to independently resolve common issues like password lockouts and access requests, significantly reducing the workload on support teams.
- Built a centralized platform for analysts that consolidates information from various systems, eliminating the need for manual data gathering and enabling quicker and more consistent customer analysis.
- Designed and integrated microservices and external systems to streamline data consolidation and automate information flows across applications.
- Automated operational workflows previously required analyst intervention, including ticket creation management, proactive password expiration notifications and automated management of customer information pending resolution.
- Engineered automation workflows to identify system errors, manage customer information, and update processes automatically once the necessary information was provided.
- Generated measurable operational impact, saving an average of **2,606 hours per month** and approximately **R\$492K in monthly operational costs**, with an annual total of **31,274 hours saved** and approximately **R\$5.9M in estimated cost savings**, achieving an overall **71% resolution rate** across the reported annual period.
- Engineered scalable internal applications using React, Next.js, and Node.js, ensuring efficient data flows by integrating frontend and backend services with various database systems.
- Implemented accessibility and internationalization standards to enhance user experience.
- Streamlined software delivery through CI/CD pipelines, automating application workflows and deployments.
- Validated application functionality through Jest testing, which improved quality and stability while minimizing production issues.
- Deployed applications, monitored performance, and ensured high availability.
- Actively participated in code reviews, pull request evaluations, developer training, and technical mentoring to foster a collaborative team environment.

Mid Software Engineer - Pague Menos Drug Store

Aug 2021 - Nov 2022

- Streamlined ordering processes directly from manufacturers, which reduced manual work for employees and helped prevent product shortages, utilizing Azure, C#, .NET, React, and React Native.
- Managed SQL Server procedures and triggers to ensure efficient database operations.
- Implemented integrations with EDI and workers to streamline processes.
- Worked with CI/CD pipelines, pull requests, and code reviews to maintain high-quality code standards.

Full Stack Developer - Tijuca Alimentos

Sep 2019 - Aug 2021

- Designed and delivered a Warehouse Management System (WMS) using JavaScript and PHP for inventory management, product location tracking, and FIFO-based picking optimization.
- Engineered backend services with PHP and Node.js, mobile applications using React Native and frontend with React.
- Maintained CI/CD pipelines with GitLab, system integrations using Pentaho and workers, and SQL Server procedures and triggers.

- Created business intelligence reports with Power BI and utilized Docker and Docker Compose for containerization.

IT Technician - Tijuca Alimentos*Jun 2017 - Sep 2019*

- Maintained and installed CCTV and network infrastructure, assembled and maintained computers, installed and configured software, and provided training and support for system implementation.

SKILLS

Backend	TypeScript, JavaScript, Node.js, Nest.js, Express, C#, .NET, PHP, REST APIs
Frontend / Mobile	React, Next.js, React Native, Angular.js, Redux, jQuery, Storybook, HTML, CSS
Databases / Data	PostgreSQL, SQL Server, MySQL, MongoDB, NoSQL, ETL, Pentaho
Cloud / DevOps	Azure, AWS, Docker, Kubernetes, Jenkins, CI/CD, Git
Architecture	Microservices Architecture, Event-Driven Architecture, Scalability, High Availability
Quality / Leadership	Jest, Unit Testing, Code Review, Stakeholder Communication, Mentoring

KEY ACHIEVEMENTS

- Increased test coverage by 60% through comprehensive unit tests using Jest.
- Delivered critical projects 20% ahead of schedule through efficient agile practices.
- Reduced application load time by 40% using Next.js optimizations.

EDUCATION

Postgraduate Degree in Software Architecture and Solutions - XP Educação*Mar 2024 - Jan 2025*
Analysis and Systems Development - Uninter*Feb 2017 - Jul 2019*
